

# EVe Mini

## Smart Charging in a Modern, Compact Housing

The EVe Mini is the newest addition to the complete line of ICU EV charging stations.

The EVe Mini has a single socket or tethered cable and is suited for any electric car thanks to its wide range of charging capacities. Through smart technology, the station is able to offset charging costs automatically and always charges at optimal speed. The housing of the EVe Mini is ultimately solid, compact and has a modern design. This makes the EVe Mini perfectly suited for at home or at the office.

# EVe Mini

**Energy (kWh) meter**  
Yes, MID certified, suited for transactions

**Dimensions (LxWxD)**  
370x240x130mm

The highest quality charger for the most competitive price

The EVe Mini is highly robust and offers smart functionalities for automatic transactions and load balancing. Despite that, the charging station is competitively priced.

SIM unlocked, free choice of service provider

All charging stations of ICU are SIM unlocked. This means that you are free to choose the charging services and payment system that suits your needs best.

Always charge at maximum power

The EVe Mini can be connected to a smart meter and takes the power consumptions of other appliances into account. This means that the EVe Mini always uses the maximum available power.
