

Elmtronics

# HOME CHARGING MADE SIMPLE!

Stylish, robust and weatherproof, ideal for indoor or outdoor use.

## DO I NEED AN ELECTRIC VEHICLE HOME CHARGE POINT?

Drivers usually choose an electric vehicle home charge point because charging times are up to 60% faster than using a 3-pin plug. The built-in safety features make charging at home more convenient and safer.

## WHAT IS THE OLEV GRANT?

Office of Low Emission Vehicles (OLEV) offer a grant to support the wider use of electric and hybrid vehicles. The OLEV grant can reduce the overall cost of supplying and installing a charge point by up to 75%. To qualify for the grant, speak to a member of the Elmtronics home charge team. Elmtronics submit the grant application on your behalf after the install - simply provide the required documentation and Elmtronics will sort the rest for you.

## CAN I CLAIM THE GRANT FOR A COMPANY VEHICLE?

Yes, as long as you are assigned to the electric vehicle for a minimum of six months.

## DO I NEED A SURVEY ON MY PROPERTY OR HOME?

Yes, a remote survey is carried out by Elmtronics - our experienced home charge advisors will guide you through every step of the survey.

## WHERE DO YOU INSTALL THE HOME CHARGE?

The home charge would be installed either in your garage or on an outside wall of your property, near to where you park your vehicle and connected to your main electricity supply.

## HOW QUICKLY CAN I HAVE MY HOME CHARGER INSTALLED?

Elmtronics aim to install within seven days after confirmation has been made. Simply book a morning or afternoon appointment with the Elmtronics home charge team.

## DO YOU NEED A QUALIFIED ELECTRICIAN TO INSTALL THE CHARGE POINT?

Yes. Elmtronics are fully trained and qualified electricians who are certified by OLEV.

## DO I NEED PRIVATE OFF STREET PARKING?

You only need private off street parking to qualify for the OLEV grant. However, should you wish to install a home charger and not claim the OLEV grant, you can have the charge point installed anywhere, subject to terms and conditions.

## CAN I CLAIM THE OLEV GRANT FOR A USED VEHICLE?

Yes, the grant is based on the date you bought the vehicle not the year the vehicle was first registered.

## HOW DO I KNOW IF MY VEHICLE QUALIFIES?

To check if your vehicle qualifies for the OLEV grant visit:
