- 3-year product warranty
- 18th Edition IET Wiring Compliant

- Start, stop and select your power rating from the App!
- Schedule charging time - helping you benefit from cheaper electricity

OLEV

The EO Mini Pro has been accredited by OLEV (Office for Low Emission Vehicles), meaning it is eligible for the Home Charge Grant. The home grant amount currently stands at 75% of the value of the charger (including installation), up to £500.

Style and Appearance

The EO Mini Pro is part of a group for Home Charging units that we supply and install, the EO Mini Pro is the smallest basic socket - making this smaller in height and length than an Apple IPAD Mini!

It's powered by intelligent software so that you can start, stop and schedule charging - all from the palm of your hand. Your next adventure, commute to work or school run starts here...

The EO Mini Pro comes in white as a standard and is one of the smallest basic socket charging units on the market, the EO Mini Pro appearance nicely blends into its surroundings. The unit can be mounted against all materials e.g. brick, wood and metal so no matter what type of housing you live in the EO Mini Pro socket would be suitable.

All versions of the charging station are very user-friendly, and the charging process is easily started by simply plugging in.

Warranty

36 months limited on site warranty.
